3.1 Dwelling units are in an “intermediate zone” as defined in the Noise Control By-law, and, as a result, are subject to the noise levels permitted in industrial and downtown districts.

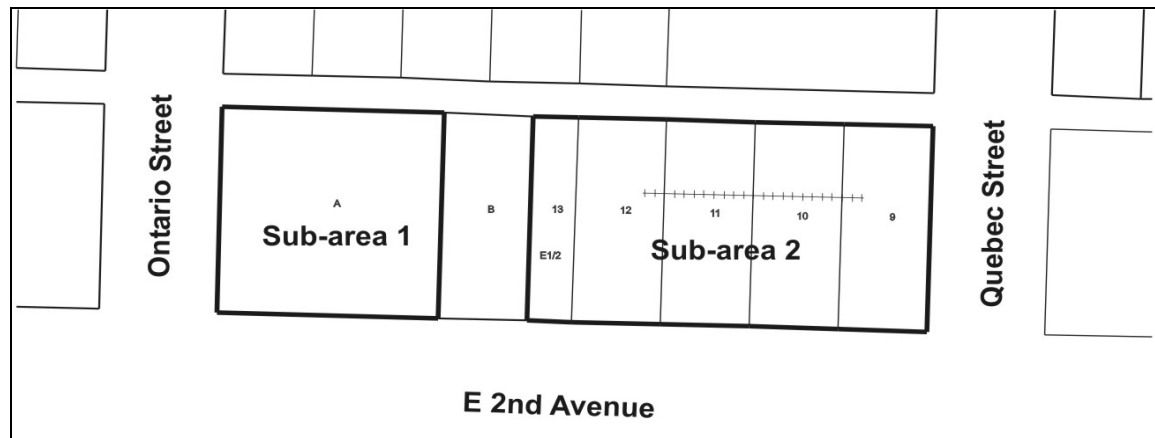

3.2 The design and lay-out of at least 25% of the dwelling units must:

- (a) be suitable for family housing;
- (b) include two or more bedrooms; and
- (c) comply with Council’s “High Density Housing for Families with Children Guidelines”.

4 Sub-areas

The site is to consist of sub-areas 1 and 2 generally as illustrated in Diagram 1:

5 Density

- 5.1 In sub-area 1, computation of floor space ratio must assume that the sub-area consists of 1406.04 m², being the size of the sub-area at the time of the application for rezoning evidenced by this By-law, and before any dedications.
- 5.2 In sub-area 2, computation of floor space ratio must assume that the sub-area consists of 2524.56 m², being the size of the sub-area at the time of the application for rezoning evidenced by this By-law, and before any dedications.
- 5.3 In sub-area 1, the floor space ratio for all uses must not exceed 4.29.
- 5.4 In sub-area 2, the floor space ratio for all uses must not exceed 5.09.
- 5.5 Computation of floor space ratio must include:
- (a) all floors having a minimum ceiling height of 1.2 m, including earthen floor, both above and below ground, measured to the extreme outer limits of the building; and
 - (b) stairways, fire escapes, elevator shafts, and other features which the Director of Planning considers similar, measured by their gross cross-sectional areas and included in the measurements for each floor at which they are located.
- 5.6 Computation of floor space ratio must exclude:
- (a) open residential balconies or sun decks, and any other appurtenances which, in the opinion of the Director of Planning, are similar to the foregoing, except that the total area of all exclusions must not exceed 8% of the residential floor area being provided;
 - (b) patios and roof gardens, if the Director of Planning first approves the design of sunroofs and walls;
 - (c) where floors are used for off-street parking and loading, the taking on or discharging of passengers, bicycle storage, heating and mechanical equipment, or uses which in the opinion of the Director of Planning are similar to the foregoing, those floors or portions

- thereof so used, which are at or below base surface, except that the maximum exclusion for a parking space must not exceed 7.3 m in length;
- (d) undeveloped floor area located above the highest storey or half-storey with a ceiling height of less than 1.2 m, and to which there is no permanent means of access other than a hatch;
 - (e) all residential storage space above or below base surface, except that if the residential storage space above base surface exceeds 3.7 m² for a dwelling unit, there is to be no exclusion for any of the residential storage space above base surface for that unit;
 - (f) amenity areas including day care facilities, recreation facilities, and meeting rooms except that the total area excluded must not exceed 1 000 m²;
 - (g) where a Building Envelope Professional as defined in the Building By-law has recommended exterior walls greater than 152 mm in thickness, the area of the walls exceeding 152 mm, but to a maximum exclusion of 152 mm thickness; and
 - (h) with respect to exterior:
 - (i) wood frame construction walls greater than 152 mm thick that accommodate RSI 3.85 (R-22) insulation, or
 - (ii) walls other than wood frame construction greater than 152 mm thick that meet the standard RSI 2.67 (R-15),

the area of such walls that exceeds 152 mm to a maximum exclusion of 51 mm of thickness for wood frame construction walls and 127 mm of thickness for other walls, except that this clause is not to apply to walls in existence before January 20, 2009. A registered professional must verify that any wall referred to in subsection (ii) meets the standards set out therein.

5.7 Computation of floor space ratio may exclude, at the discretion of the Director of Planning or Development Permit Board:

- (a) enclosed residential balconies if the Director of Planning or Development Permit Board first considers all applicable policies and guidelines adopted by Council, and approves the design of any balcony enclosure, except that:
 - (i) the total area of all open and enclosed balcony or sundeck exclusions must not exceed 8% of the residential floor area being provided, and
 - (ii) enclosure of the excluded balcony floor area must not exceed 50%;
- (b) windows recessed into the building face to a depth of no more than 160 mm, except that the Director of Planning or Development Permit Board may allow a greater depth in cases where it improves building character;
- (c) unenclosed outdoor areas at grade level underneath building overhangs, if:

- (d) passive solar appurtenances to reduce solar gain; and
- (e) structures such as pergolas, trellises, and tool sheds which support the use of intensive green roofs and urban agriculture.

5.8 The use of floor space excluded under section 5.6 or 5.7 must not include any purpose other than that which justified the exclusion.

6 Building height

6.1 In sub-area 1, the building height, measured above base surface, must not exceed 38.1 m.

6.2 In sub-area 2, the building height, measured above base surface, must not exceed 72.2 m.

6.3 Section 10.11 of the Zoning and Development By-law is to apply except that, despite section 10.11 and sections 5.1 and 5.2 of this By-law, the Director of Planning or Development Permit Board, as the case may be, may permit a greater height than otherwise permitted for structures

which support the use of intensive green roofs or urban agriculture, such as elevator and stair enclosures, amenity areas, tool sheds, trellises, and other garden structures.

7 Parking, loading, and bicycle spaces

Any development or use of the site requires the provision and maintenance, in accordance with the requirements of, and relaxations, exemptions and mixed use reductions in, the Parking By-law, of off-street parking spaces, loading spaces, and bicycle spaces, all as defined under the Parking By-law.

8 Acoustics

All development permit applications require evidence in the form of a report and recommendations prepared by a person trained in acoustics and current techniques of noise measurement, demonstrating that the noise levels in those portions of dwelling units listed below do not exceed the noise level set opposite such portions. For the purposes of this section, the noise level is the A-weighted 24-hour equivalent (Leq) sound level and is defined simply as noise level in decibels.

Portions of dwelling units	Noise levels (Decibels)
Bedrooms	35
Living, dining, recreation rooms	40
Kitchen, bathrooms, hallways	45

9 Severability

A decision by a court that any part of this By-law is illegal, void, or unenforceable severs that part from this By-law, and is not to affect the balance of this By-law.

10 Force and effect

This By-law is to come into force and take effect on the date of its enactment.

ENACTED by Council this 12th day of July, 2011.
